DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed June 26, 2003 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because there was no copy provided for the reference "Optical Instruments; Reflective and Catadioptric Objectives; (pp. 18.2-18.3)." Further, there is no associated information that would allow the examiner to search for the reference. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 22 and 24 are rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art (paragraphs 0002, 0005 and 0006).

Regarding claim 22, the admitted prior art (paragraph 0006) discloses "an optical element having an aspheric surface with an aspheric surface configuration represented by a function (see equation 1) having a maximized degrees of freedom for the aspheric surface configured of a whole surface of the at least one optical element, wherein the

Art Unit: 2851

optical element performs a projection exposure on a second surface of an image of a pattern formed on a first surface (paragraph 0002).”

Regarding claim 24, the admitted prior art (paragraph 0005) discloses “wherein the system is a reflection system.”

Allowable Subject Matter

3. Claims 1-21 and 27-28 are allowed.

4. The following is an examiner’s statement of reasons for allowance:

The prior art does not teach or disclose a projection optical device with an optical element with an aspheric surface that has a surface shape which is represented by a non-even function $Z=g(h)$, wherein Z is a distance between the aspheric surface and a plane at a vertex of the surface perpendicular to a the rotational axis of the aspheric surface and h is a distance from the rotation axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

5. Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2851

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Koch, et al. (US 6,195,201) and Williamson (US 5,815,310) each disclose a projection optical system that utilizes multiple aspheric mirrors.
